

Introducing the 3600 Ultra-Rugged Series

Solution overview

The 3600 Ultra-Rugged Series is Zebra's next generation of industrial handheld scanners, purpose built from the ground up to set new standards for durability, performance and manageability. These scanners will eventually replace the Zebra 3400 & 3500 rugged series.

Deployment Environments

Market	Sub Segment	Unique Application/Needs
Warehouse & Distribution	Warehousing	Pick/Pack, WIP, Cross Dock
		Inventory Tracking
	Distribution	Shipping & Receiving Track & Trace
Manufacturing Plant Floor	Plant Floor	DPM
	Plant Floor	Parts Replenishments
	Mfg. Warehousing	Same as W&D Segment

Why the 3600 Ultra-Rugged Series?

The Zebra 3600 scanner family is designed for “unstoppable performance” - purpose built to take more of a beating over a longer period of time, to scan faster and farther with greater accuracy and increased speed, and to be deployed faster and managed more efficiently across an enterprise.

- **Ultra-Rugged:** The most rugged line of scanners ever produced, featuring industry-leading sealing, drop and tumble specifications, and reliable operation whether covered in dust or grease, sprayed with high pressure water jets or completely immersed in water
- **Superior Scanning:** Designed from the ground up to provide superior scan performance in mission critical use cases — especially on less than perfect barcodes typically found in industrial environments
- **Manageability:** Zebra offers the time saving, productivity enhancing tools at no additional charge to help customers manage their scanner fleet from initial configuration to day-to-day operation

Introducing the 3600 Ultra-Rugged Series

Portfolio Overview

LI3608 LI3678	1D	LINEAR IMAGER Ideal for those who prefer simplicity of point and shoot laser –like experience Better than any laser available	Bright Crisp Aimer
--------------------------	-----------	--	-----------------------------------

Shipping and Receiving on loading docks and receiving dock doors. Small Item pick and pack, Mfg WIP.

DS3608SR DS3678SR	1D/2D	STANDARD RANGE 2D IMAGER For maximum barcode flexibility. Read the barcodes needed today and future proof for the applications of the future	Near Contact to 28"
------------------------------	--------------	--	------------------------------------

Shipping and Receiving on loading docks and receiving dock doors. Small Item pick and pack, Mfg WIP.

DS3608DP DS3678DP	1D/2D	DPM 2D IMAGER The choice for direct part mark; laser etched, dot peened	DPM w/ diffuser
------------------------------	--------------	---	----------------------------

Lifetime Identification (UID), Track & Trace, Maintenance Management, Warranty Service, Product Authentication, Automotive / Aerospace / Defense

DS3608ER DS3678ER	1D/2D	EXTENDED RANGE SCANNING Ideal choice for near and far scanning. Perfect choice when paired with vehicle mounted mobile computers. Reads out to nearly 60'	Only ER with up close scanning
------------------------------	--------------	---	---

Picking, Forklift applications, WH /DC, Transportation Cross dock

DS3608HP DS3678HP	1D/2D	HIGH PERFORMANCE 2D IMAGER The user can scan barcodes nearly 4 ft away; eliminates having to move close to the barcode. Scanning from farther away clear and easy. Also Ideal for image capture applications.	OCR & Image Capture
------------------------------	--------------	---	--

Mid-Range reading for reading large items on loading docks for shipping and receiving. Package / Courier services poof of delivery / image capture.

DS3608HD DS3678HD	1D/2D	HIGH DENSITY 2D IMAGER Great performance on small dense 3 mil codes. Basic image capture	3 mil High Density
------------------------------	--------------	--	-------------------------------

Electronics Mfg, Medical equipment Mfg, Telecom
