A2B Tracking Solutions Announces The Danby Group as Reseller Partner

PORTSMOUTH, RI (August 4, 2008) – A2B Tracking Solutions Inc, the leading provider of unique identification (UID) compliance products and services for Department of Defense (DoD) contractors and installations has added The Danby Group of Atlanta, as a Reseller Partner. A2B’s UID Comply!® data management software enables full compliance with MIL-STD-130 and MIL-STD 129. These standards are a response to the CFO Act of 1990 which requires greater visibility and lifecycle management of the military’s assets worldwide.

In making the announcement A2B’s President Peter Collins said, “The Danby Group has the spot-on expertise required to lead DoD suppliers to UID compliance. Their focus on helping companies build robust UID systems makes our two organizations natural partners.”

UID Comply!® software is a complete IUID lifecycle data management system which enables printing, marking, verifying, validating, and reading of all IUID compliant constructs and formats, as well as storing of the information, and uploading of data to the IUID Registry . Each event performed is logged in order to create a precise audit trail.

“We are very excited to add UID Comply! to our line-up of integrated tracking and compliance systems. A2B has a rich experience in tracking software that perfectly complements our line of hardware and services in our focus on UID and RFID auto-id solutions.” says Genie Ragin, President, The Danby Group.

Rich Bruce, UID/RFID Business Development Manager for The Danby Group, says “A2B is a proven leader in UID Compliance solutions offering an array of products allowing the customer to select the exact functions their circumstances require. The software is feature rich and extremely user friendly. The A2B/Danby Group amalgamation enhances our ability to provide complete, flexible solutions tailored to our customer’s needs.”

UID is mandated landmark policy by the DoD requiring all assets and personal property owned by the DoD, including assets in the possession of contractors and legacy items at military installations, to be marked with a unique serialized identification number and then registered in accordance with MIL-STD-130N.

About A2B Tracking Solutions Inc.

A2B Tracking Solutions Inc. is the leading provider of total solutions for bar code tracking. Most recently A2B has developed UID Comply!® data management software to streamline the UID compliance process. Since it was founded in 1994, A2B has been the leader in bar code tracking utilizing mobile computing. Among A2B's achievements is the development of a state-of-the-art mobile tracking system for one of America's largest parcel delivery companies. Principals of A2B include founders of the bar code industry who have been in the vanguard of bar code innovation in applications for 40 years. To date, A2B has completed more than 2,000 tracking installations around the world. For more information about A2B Tracking, visit www.uidsolutions.com or phone 800-733-7592.

About The Danby Group

The Danby Group offers data collection hardware and systems, integrating barcode, UID, and RFID technologies for manufacturing. Established in 1982, it was one of the first reseller/distribution channels for Zebra Technologies International, selling data capture systems and equipment to a variety of manufacturers and government entities/contractors, including the United States Marine Corps, IBM, Motorola, and Honeywell. The Danby Group is a small, woman-owned enterprise headquartered in Atlanta, Georgia. For more information, visit www.danbygroup.com or contact Genie Ragin: 800/262-2629.
