

## Current Product Line

Stratum Global offers a complete integrated RFID software solution called **TagNet™**. The Company also offers education, custom programming, and other services related to the installation and support of the **TagNet™** System. Although prevalent in other marketplaces, the Company feels that offering the software without the associated services and hardware would be a distinct disadvantage in selling the software product itself. Products and services currently offered include the following:

### Software

#### **TagNet™ Server Foundation Edition**

Permits up to 10 read zones (logical Reader locations) defined within Reader Management including remote monitoring of those RFID assets. Enables Applications to subscribe to Tag Events using specific filtering criteria and integrates that tag data with enterprise systems (ex. ERP or WMS). Includes Object Repository and Location Management modules.

#### **TagNet™ Server Corporate Edition**

Permits up to 50 read zones (logical Reader locations) defined within Reader Management including remote monitoring of those RFID assets. Enables Applications to subscribe to Tag Events using specific filtering criteria and integrates that tag data with enterprise systems (ex. ERP or WMS). Includes Object Repository and Location Management modules.

#### **TagNet™ Server Enterprise Edition**

Permits up to 100 read zones (logical Reader locations) defined within Reader Management including remote monitoring of those RFID assets. Enables Applications to subscribe to Tag Events using specific filtering criteria and integrates that tag data with enterprise systems (ex. ERP or WMS). Includes Object Repository and Location Management modules.

### **TagMap**

Application residing on mobile handheld readers that associates (maps) RFID tags with meaningful object IDs found in enterprise systems such as Products, People or Assets. Also provides ad-hoc object identification and inventory transaction capability.

### **AssetTrack**

Application residing on mobile handheld readers that provides asset identification and location management via RFID as well as inspection reporting for those assets.. Asset information can reside within **TagNet™** or an enterprise Asset Management System.

### **TagTrack**

Integrated RFID Inventory Management solution for mobile lift trucks or similar material handling vehicles providing real-time directed inventory put-aways with driver interaction. Works with **TagNet™** Location Management Module or customer inventory management systems.

## **Tagging Station**

Self contained conveyer solution with RFID infrastructure for high volume tagging of existing bar-coded case stock. Provides real-time scan of existing case barcodes and produces EPCglobal standard SmartLabels for automatic application via Print & Apply hardware. Provides EPC Pallet/Case data for furtherance to large RFID requesting entities such as Wal-mart, Target and DoD.

## **Services**

### **Professional Services**

Delivery Services for the planning, installation, customization and on-going operation of **TagNer™** including business consulting, project planning, installation, custom programming, user training, and technical services.

### **Readiness Assessments**

The Readiness Assessment outlines an RFID 'moving forward' strategy to gain overall incremental RFID ROI based on a phased rollout for the entire organization. Stratum Global believes that in order to bring RFID value into an organization, they must first understand their requirements, and then combine Stratum Global's RFID expertise with a discovery process before they fully invest in RFID.

### **Integration Adapters**

Professional Services for the integration of TagNet RFID event data into existing enterprise systems. Multiple adapters are available base upon the customer's protocol of choice as well as their enterprise solutions (ERP, WMS, Labor Collection, Logistics, etc.).

## **Hardware**

### **RFID Hardware**

Fixed Readers, Handhelds, Antennas, Printers, Tags, Lights and Sensors are all required components to deliver a complete solution to the Customer. Stratum Global resells these components with margin ranging from 25% - 38% depending on the particular item.

The following, although not strictly products, represent important sources of revenue to the company:
