- ✓ Invest Incrementally
- ✓ Integrates With Your Enterprise Systems
- ✓ Proven Experts in Implementing RFID Technology

Stratum Global For RFID...

Stratum Global is an RFID Application Software Company focused on providing innovative solutions for our Clients. Our focus on providing object visibility has built a Client list from Fortune 500 Companies to small organizations looking to increase productivity, lower costs and reduce overall risk. Our Team is amongst the elite group of industry leaders in RFID with many years of hands-on, real world experience in systems and RFID deployment. **Our sole business is RFID.**

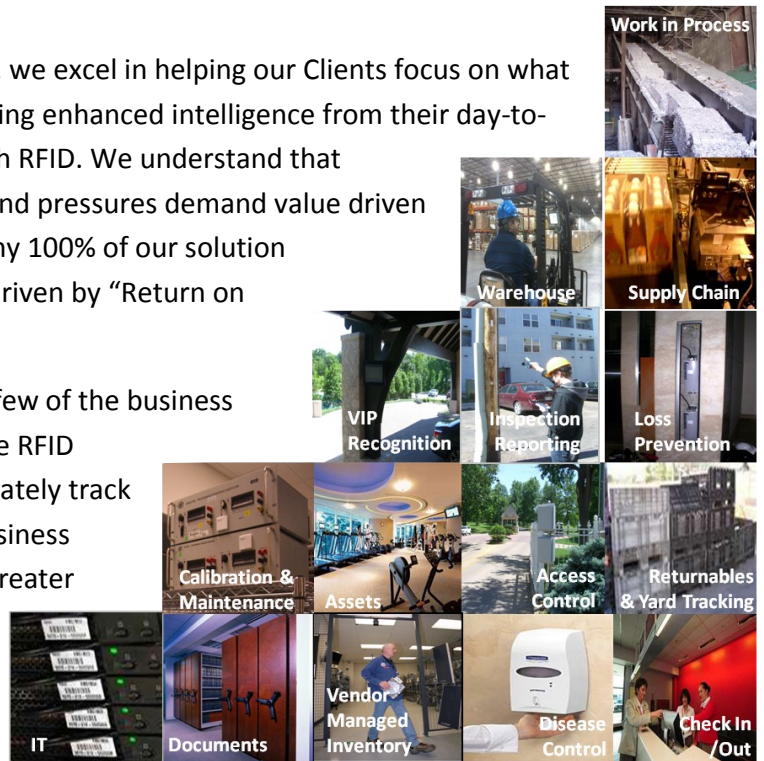

Software

TagNet™ is a robust Enterprise RFID software solution suite that addresses all aspects of object visibility through RFID across multiple industries and business processes. TagNet is browser based, release supported RFID business application software designed to operate without introducing unnecessary complexity to the end-user. Our solutions are hardware agnostic supporting a plug-and-play selection of industry standard RFID Readers, Printers, Sensors, and Material Handling Equipment. TagNet is designed to meet the sophistication and scalability requirements of large organizations and at the same time address Phase I RFID solutions within a short timeframe.

Our Expertise

Regardless of Industry, we excel in helping our Clients focus on what they do best by providing enhanced intelligence from their day-to-day operations through RFID. We understand that economic conditions and pressures demand value driven investments. That's why 100% of our solution implementations are driven by "Return on Investment" analytics.

To the right are just a few of the business processes that we have RFID enabled to more accurately track assets and monitor business processes to provide greater visibility into their operations without breaking the bank.

Industry Driven

We firmly believe that understanding of a Client's industry is every bit as important as in-depth RFID technology expertise. That's why we rely so heavily on our industry specialists whether on staff at Stratum or within our extensive Partner channel. Our TagNet solution software is repeatable and enables it to be configured for multiple industries by those same industry specialists.

Stratum Global or one of our Certified Partners offer high-level subject matter expertise in the industries listed here. We specialize in using our in-depth industry knowledge to help our Clients respond to current industry demands for RFID.

Are You Ready For RFID?

Ask yourself:

- ✓ Do we ever lose or misplace items and in turn reduce our productivity?
- ✓ If we had a better handle on the location of all of our assets, could we redeploy personnel to higher priority projects or tasks?
- ✓ Do we ever order products or equipment only to find out we had a similar item that was under-utilized or not located at the time we placed the order?
- ✓ Are we currently using manual, time-consuming, processes that could be automated, thus improving our productivity?

If you answered "Yes" to any of the above, call below or visit us at www.stratumglobal.com

About The Danby Group

Since 1982, The Danby Group, LLP has been supplying Fortune 1000 companies with the latest in automatic identification solutions, including label printing systems and data collection systems.
