

## For a Limited Time, Zebra is Offering Free Custom Die Tooling!

We're here to fulfill your every labeling whim! The Danby Group has helped you with custom and stock label needs through the years, and while our list of stock labels is extensive, maybe you've been making do with a less than perfect label size or material?

Well, let's make it happen! Zebra is offering FREE dies (the tooling needed to cut, perforate and score a label on press) for all custom labels. *There are no restrictions or limitations.* Tooling costs can run to several thousand dollars depending on the label design - this is your chance to get just the label you want for a great reduction in price.

Here are just a few ideas...maybe you need to:

- Have a more polished pre-printed color label with your logo and/or other static information?
- Design a multi-part label with sections that can be removed for other uses?
- Keep the same size but switch from paper to a long-lasting synthetic material (dies are different for paper and synthetic)
- Gain more flexibility with a removable adhesive instead of permanent?

Just call us at 800-262-2629 or simply fill out our Request Custom Label form on [www.danbygroup.com/labeling](http://www.danbygroup.com/labeling) we'll have one of our labeling experts contact you right away!
